Subject: Proposed Microsoft Settlement

I strongly oppose the prospect of allowing Microsoft to pay its penalty in the anti trust case by donating ANY amount of software / hardware to schools. This action would only serve to PROMOTE the abuse of Microsoft's monopoly position in the market the government and plaintiffs have worked so hard to expose.

A better solution would be for Microsoft to make a CASH contribution to needy schools and charities or where possible, to the companies they actually hurt with their actions.

Thank you for the pursuit of this case.

Joe Spencer
